LISTENING SESSION

Food Safety Modernization Act:

Updated Proposed Rule for Produce Safety, Updated Proposed Rule for Preventive Controls for Human Food, Updated Proposed Rule for Preventive Controls for Animal Food

The FDA Food Safety Modernization Act (FSMA) was signed into law by President Obama on January 4, 2011. It aims to ensure the U.S. food supply is safe by shifting the focus of federal regulators from responding to contamination to preventing it. On September 29, 2014, the FDA issued the following updated proposed rules for comment: produce safety; preventive controls for human food; and preventive controls for animal food. The California Department of Food and Agriculture (CDFA) will be hosting a public listening session concerning three updated proposed rules. The purpose of the listening session is to provide industry an overview of the updated proposed rules, solicit comments, respond to questions, and inform the public about the rulemaking process. You're invited to attend at the following location and times:
